New Product Announcement
RECOR 323 XVC

Reynolds Equipment Co. is pleased to announce the release of an enhanced LVC volume corrector. The model designator is RECOR 323 XVC (version 2.05). Volume production is expected in the first quarter of 2001. A new host, LVCHOST for Windows (version 4.11), is released and available on our web site. The new host serves both the new 323 XVC and older 323 LVC correctors.

New Firmware Features:

- Monthly, Daily, and Hourly Contract Accumulators.
- Nominations and Allocations.
- High Contract Month Alarm.
- High Contract Month Warning.
- High Contract Day Alarm.
- Current Contract Month Minimum and Maximum Daily Flow.
- Current Contract Month Minimum and Maximum Hourly Flow.
- Previous Contract Month Minimum and Maximum Daily Flow.
- Previous Contract Month Minimum and Maximum Hourly Flow.
- Previous Contract Monthly Corrected and Uncorrected Volume Accumulators.
- Programmable Contract Month Start-of-Day Hour and Start-of-Month Day.
- Previous Month Accumulators displayed on LCD as part of the scroll sequence.
- Any or all Alarms may be Configured to Originate a Call.
- Scheduled Call Origination for Downloading.
- Event Log, Recording Configuration Changes and Alarms.
- Metric Units of measure.
- Extended range values for nitrogen and carbon dioxide.
