

The Latest Version 323 XVC features

1. Profiler size increased to 130 days of hourly data (Uncor, Corr vol, press & gas temp.)
2. Eventlog in unit (200+ events with old and new values)(Sort by user name, Date of event, or event name)
3. Contract Hour (Resets every hour) (Displayed as CF)
4. Contract Day (Resets every day based on the “contract hour” set in host) (Displayed as CF)
5. Contract Month (Resets every Month based on the contract “Start of Month day” set in host) (Displayed as CF)
6. All alarms have a new mode: “Manual Call” (This mode allows a field modem to dial a number to call a pager or phone to a host)(MV-90 is only host so far that will receive these calls at this time)
7. New Alarms added:
 - a. High Contract Month
 - b. Warning Contract Month
 - c. High Contract Day
8. Contract Management:
 - a. Nomination
 - b. Allocation
9. Current Month Min and Max Flows
 - a. Minimum Hour
 - b. Maximum Hour
 - c. Minimum Day
 - d. Maximum Day
10. Previous Month Min and Max Flows
 - a. Minimum Hour
 - b. Maximum Hour
 - c. Minimum Day
 - d. Maximum Day
11. Previous Month Uncorrected Volume on LCD (Selectable)(Based on selected contract start & end hour, unit will record total volume and display it on LCD)(Reading will update LCD at the beginning of new contract month)
12. Previous Month Corrected Volume on LCD (Selectable)(Based on selected start & end hour, unit will record total volume and display it on LCD)(Reading will update LCD at the beginning of new contract month)
13. Convert Profiler files to CSV (Profiler files will automatically run in Excel to generate graphs etc.)(If your default spreadsheet is Lotus, it will run that program instead of Excel)
14. Export to PGAS. (Easily export to the PGAS system)
